

## USING A SEW-ON LABEL AS CENTER FOLD

Would you like to design a sew-on label with center fold and use it as a loop?

This is only possible by placing the exact same text twice on the label, with 3 spaces between the text (about 1 cm).

Example: type your text, followed by typing the space bar 3 times, type the same text again.

41 mm

**also using a symbol?**

## SELECT LEFT AND RIGHT

Our labels are built up from the middle so you have to select the symbol on both sides (left and right).

If not your label will not have the same length on both sides, this way the fold cannot be made in the center.
